

Assignment 11: Short Story Script

Due: April 28

DIGITAL STORYTELLING - Write a Story / Voice-Over Script

Create a short story or informative narration based on your chosen subject matter, preferably related to the topic of your website. Fill in storyboard forms on front and back of this sheet completely by writing your story on the lines and sketching what photos / pictures / or video you will show to illustrate the story during each part of your podcast. This story will function as a short voice-over script which will be recorded using Garageband, then used to create the soundtrack for a video podcast (created in Imovie) for the next assignment. You can use photos, videos or drawings for your podcast. Think carefully about what images you will show, during each scene of the words from your story.

This assignment is worth 15 points total. Latework will not receive full credit.

The sneaky brown dog was grabbing items from the trash can, when....
