

Assignment 6 : Automated web photo gallery - Due: March 17

✓ NAME HERE:

	Having 6-10 photos which are color corrected, nicely composed and aesthetically pleasing in your gallery - 5pts	
	Creating html file, which functions correctly & when clicked loads into a web photo gallery - 2 pts	
	Putting name, contact info appears somewhere on the page using Photoshop's automated features -2 pts	
	Correctly burning CD with web folder, labeling with name, DM77 (no missing files) - 1 pt	
	<i>Test your CD and the files on it, to be sure it works, before turning in!</i>	
	forgetting to write your name at top of this box, labeling your CD directly on disc with sharpie - minus -1 pt	
	<i>This project is worth 10 points total. Late projects will not receive full credit.</i>	final grade:

Once you have edited, and done basic adjustments to your photographs (8 or more photographs) to your satisfaction, (grade is based on quality of your photographs, color adjustments, and composition - see above). It is time to make a web photo gallery. In order for the automating photo gallery function in photoshop to work, first, put all your images into one folder on the computer's hard drive.

Within Photoshop;

1. go to the FILE menu, scroll down to AUTOMATE (about 3/4 down the menu) choose web photo gallery.
2. choose from the STYLES menu, what you would like your automated photo gallery to look like. (also enter your email)
3. Under source images, select the CHOOSE button, to direct Photoshop to where your folder of images is living on your hard drive.
4. Select a destination Folder (create one on your portable drive) this is where you want your entire web photo

gallery to live, once Photoshop creates it

5. Choose from the OPTIONS first enter info for a BANNER (site name, photographer name and contact info)

Choose the size of your images. (medium set to 350 pixels)

Choose the size of your thumbnails

Choose custom colors, so your web photo gallery is unique!

Choose Security and ADD a copyright

6. Click the OK button when you are ready to go! (sit back, relax and watch Photoshop do all the work!)

7. Name your web site folder using "your nameGallery." Burn entire web gallery (image folder + html file) onto a CD, label the CD with your FIRST & LAST Name, DM77 - Web photo gallery project - by writing directly on the CD with a sharpie marker. Do NOT turn in a blank unlabeled CD, even if it is in a paper-labeled case, or you will NOT receive a grade.

(these photo galleries will become part of your final DM77 class projects)

Clearly labeled CD containing your web folder file is due at the beginning of class, with this assignment paper folded into the jewelcase on March 17.

Late work will NOT receive full credit. Projects not containing this assignment sheet will not be graded
